- The fan should always be installed so that safe operation and maintenance can be ensured.

ELECTRICAL CONNECTION.

- Before Installation and Wiring **ENSURE THE MAINS ELECTRICAL SUPPLY IS DISCONNECTED!!**
- Ensure that the voltage and frequency of the electrical supply match the information stated on the Data Plate of the unit

(maximum recommended tolerance of Voltage (V) and Frequency (Hz) \pm 5%).

- Connect the electrical supply in accordance with the electrical wiring diagrams included within this booklet.
- Ensure that all earth connections have been made correctly
- All fans are fitted with thermal protection (TP). Ensure that it is correctly wired. Failure to do so may cause damage to the motor and invalidate the guarantee.
- Before operation, check all connections are correct and there are no obstructions to the airflow.
- On connecting the electrical supply ensure the direction of rotation and airflow correspond with the direction of airflow / rotation arrows (sited on unit).
